This would be a good tool for table-top rpgs or miniture style games. However, it's trash. There is no community support, so you can't share what you do. Multiplayer options are tedious and require some amount of tech knowlege. Having owned this for quite a while, i've yet to see any substantave changes in updates, and devs have moved on to other projects.. This would be better if you didn't have to play online there should be an offline mode so i would just wait for that other then that it is very good.
